PROFESSIONAL SUMMARY

Full-Stack Developer and AI Engineer with production experience shipping complete SaaS products, agentic AI systems, and LLM-integrated applications. Independently built and launched three live products: unified marketing analytics dashboard, AI-powered email client, and LLC formation platform. Experienced with TypeScript stack (Next.js, Prisma, PostgreSQL), Python (FastAPI), and AI integration (Claude, Gemini). Delivered end-to-end automation solutions using n8n, voice AI agents (Vapi), and multi-agent AI pipelines. Uses AI-assisted development (Claude Code) as workflow multiplier.

TECHNICAL SKILLS

Frontend: Next.js 14, React.js, TypeScript, Tailwind CSS v4, shadcn/ui, PWA, Service Workers

Backend: Java, Spring Boot, Python, FastAPI, Node.js, REST APIs, WebSockets, Background Jobs

Databases: PostgreSQL, MySQL, Prisma ORM, Redis, SQLite, Qdrant (Vector DB), Spring Data JPA

Auth & Security: NextAuth v5, JWT, OAuth2 (Google, Meta, TikTok, LinkedIn), AES-256 Encryption

AI Integration: Claude API (Sonnet/Haiku), Gemini API, OpenAI API, LangChain, Tool/Function Calling

Testing: Vitest (80+ unit tests), Playwright E2E, TypeScript strict mode

DevOps: Docker, Railway, Render, Vercel, Netlify, Git/GitHub

Automation: n8n, GoHighLevel CRM, Vapi (Voice AI), Apify, Playwright Scraping

PROFESSIONAL EXPERIENCE

Full-Stack Developer & AI Engineer

Feb 2026 – Present • Contract (Remote)

- Independently built and launched Onelytics – multi-tenant SaaS with OAuth integrations across 6 platforms (Google Analytics, Ads, Meta, TikTok, LinkedIn), Redis caching, role-based workspace management, and AI-powered summaries via Claude API. Deployed on Railway.
- Built Compass Registered Agent – LLC formation platform with Stripe checkout, GoHighLevel CRM sync, PDF generation with @react-pdf/renderer, and Cloudflare R2 storage. Deployed on Railway.
- Built Inboxd – AI-powered email client unifying Gmail, IMAP, and Outlook with Claude Sonnet summaries, 3-strategy reply drafts, priority triage, full PWA with offline shell, and 80+ Vitest tests.
- Designed and deployed comprehensive n8n automation suite: 6 featured workflows spanning AI marketing campaigns (5-phase orchestration), LinkedIn B2B outreach, RAG pipelines, smart lead scraping, GoHighLevel CRM automation, and missed-call recovery. 20+ total workflows.

AI Automation Engineer & Full-Stack Developer

Oct 2025 – Feb 2026 • Contract (Remote + On-site)

- Built backend API infrastructure for voice AI systems using Vapi – dynamic conversation flows, intent detection, CRM action triggers, and missed-call recovery pipelines integrated with GoHighLevel.
- Delivered client-facing automation systems connecting multiple third-party APIs and services, translating business requirements into production-ready technical solutions independently.
- Built reusable integration templates and webhook-driven workflows reducing client onboarding time significantly.

Full-Stack Developer Intern

Jan 2022 – Apr 2022 • HighRadius

- Developed and tested REST APIs using Spring Boot for B2B fintech platform – data models, business logic, database operations.

- Built reusable React components following design specifications, contributing to sprint reviews and Agile team delivery.

PROJECTS

Exchange Four SEO Engine – Autonomous AI-Search & SEO Agent System

Python • claude-agent-sdk • Supabase (Postgres) • WordPress REST API • OpenSEO MCP • Railway

- Autonomous, self-improving SEO and AI-search agent system – researches, writes, publishes, audits, and measures organic ranking/traffic impact on a schedule.
- 5-agent loop (Research/Content/Technical/Measure/Report) with deterministic orchestration around agentic judgment.
- Human approval gate only on irreversible actions – otherwise runs headless on a schedule.
- MCP integration (OpenSEO) for SEO audits, Core Web Vitals, and Search Console data.

Compass Registered Agent – LLC Formation & Legal Services Platform [Live][GitHub]

Next.js 14 • TypeScript • Prisma • PostgreSQL • NextAuth v5 • Stripe • GoHighLevel • Cloudflare R2 • Resend • Railway

- Client-facing platform for Florida LLC formation, annual report filing, compliance calendar.
- Ops workbench with stage transitions and bidirectional GoHighLevel CRM sync via signed webhooks.
- PDF generation, AES-256 encryption, full Vitest + Playwright test suite.

Onelytics – Unified Marketing Analytics Dashboard [Live][GitHub]

Next.js 14 • TypeScript • PostgreSQL • Prisma • Redis • Claude API • NextAuth • Railway

- Multi-tenant SaaS connecting Google Analytics, Ads, Meta, TikTok, LinkedIn Ads with AI summaries via Claude Haiku.
- Role-based workspace management, OAuth flow for 6 platforms, demo mode with seeded data.

n8n Workflows Portfolio – Advanced AI Automation & CRM Integration Suite [GitHub]

n8n • Google Gemini • OpenAI • Qdrant • GoHighLevel • LinkedIn API • Apify

- AI Marketing Campaign Pipeline (5 Master Workflows): End-to-end AI-driven system with sequential phases, AI agents for research/strategy/copywriting/delivery.
- LinkedIn DMs B2B Campaign (3 Workflows): Automated outreach with intelligent rate-limiting, daily counter resets, Google Sheets state management.
- RAG Knowledge Agent (3 Flows): Document ingestion, Qdrant vectors + MySQL hybrid storage, semantic search with grounded answers.
- Smart Leads Scraper, CRM Automation (GoHighLevel), Missed Call Recovery. Total: 20+ workflows demonstrating multi-workflow orchestration, AI agents, vector DBs.

ORISO Platform – Open-Source Counseling Platform (Freelance Contributor) [Open Source]

Java • Spring Boot • React • TypeScript • MongoDB • MariaDB • Keycloak • Kubernetes

- Paid freelance contributor on a live, AGPLv3 multi-tenant platform used by roughly 5,000 social counselors in Germany.
- Delivered changes across an 11-repo polyglot microservice architecture spanning Java backends, React frontends, Keycloak SSO, and Kubernetes deployment.

EDUCATION

B.Tech in Computer Science & Engineering – Graduated 2023

Chandigarh University, Mohali

CERTIFICATIONS

- Coding Ninjas – Full Stack Web Development: Java, Spring Boot, React, REST APIs, database design, deployment.
- Coding Ninjas – Java & Data Structures: OOP fundamentals, algorithm design, competitive programming.
- HighRadius Internship Completion Certificate – Full-stack development on B2B fintech application.
