PROFESSIONAL SUMMARY

B.Tech CSE graduate with hands-on experience in full-stack development using Java/Spring Boot and React/Next.js. Proficient in designing and deploying REST APIs, building responsive web interfaces, and working with databases and Docker. Demonstrated ability to take requirements from concept to deployed production app. Comfortable reading technical documentation, integrating third-party APIs and services, and writing clean, maintainable code.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML/CSS, SQL

Backend & Frameworks: Spring Boot, Spring Security, REST APIs, Spring Data JPA, MySQL, PostgreSQL

Frontend & Libraries: React.js, Next.js, Tailwind CSS, UI component libraries

Tools & Platforms: Docker, Git/GitHub, n8n (workflow automation), Postman, VS Code, IntelliJ IDEA

Cloud & DevOps: Familiar with deployment on Render, Netlify; learning Docker containerization and cloud basics

Other: API integration, authentication flows (JWT, OAuth)

PROFESSIONAL EXPERIENCE

Full-Stack Intern | HighRadius | [Month Year] – [Month Year]

- Contributed to a cloud-based B2B fintech application, working across backend REST API development and frontend UI components.
- Implemented and tested REST APIs using Spring Boot, handling data models, business logic and database operations.

- Built reusable React/web components following design specifications and best practices.

PROJECTS

AI Counsellor - University Admissions Platform | [[Live Demo](#)] | [[Source Code](#)]

Tech Stack: Spring Boot, Java, Next.js, React, TypeScript, PostgreSQL, JWT, Docker, AI Agents, Tool Calling, Gemini API, Tailwind CSS v4

- Designed and deployed a full-stack AI-powered university admissions counseling platform with **agentic AI that autonomously performs database operations** (shortlist/lock universities, create tasks) via structured JSON output.
- Implemented **multi-provider AI integration** (Gemini, OpenRouter, Perplexity) with automatic fallback for high availability and **strict hallucination prevention** using validation rules to prevent AI from inventing university data.
- Built **stage-based decision flow** system that guides users through onboarding (stage 1), university discovery (stage 2), selection (stage 3), and application preparation (stage 4) with contextual AI recommendations.
- Developed **tool calling architecture** where AI executes real actions: shortlisting universities, locking final choices, creating personalized tasks—all validated against actual database records.
- Created modern **glassmorphism UI** with Tailwind CSS v4, featuring conversation history storage, real-time AI responses, and responsive design for seamless user experience.
- **Key Learning:** Agentic AI architecture, tool/function calling patterns, prompt engineering, AI safety (hallucination prevention), multi-provider integration, advanced state management, production-grade AI applications.

Real-Time Chat Application | [[Live Demo](#)][[Source Code](#)]

Tech Stack: Spring Boot, React, WebSocket, Spring Security, MySQL, Docker, Render

- Designed and deployed a full-stack chat application with real-time message synchronization using WebSockets.
- Implemented user authentication and authorization using Spring Security and JWT tokens.
- Built React frontend with responsive UI, message history and user online status indicators.
- Containerized application using Docker and deployed on Render for production access.
- **Key Learning:** WebSocket communication, real-time data handling, authentication flows, end-to-end deployment.

Busy Buy – E-Commerce UI | [[Live Demo](#)] | [[Source Code](#)]

Tech Stack: React.js, Tailwind CSS, REST API integration, Responsive Design

- Developed responsive e-commerce frontend with product listing, filtering, cart functionality and checkout flow.
- Integrated REST APIs for dynamic data fetching and real-time updates.
- Implemented pagination, search and category filtering for better user experience.
- Ensured mobile-first design and cross-browser compatibility.
- **Key Learning:** React hooks, state management, API integration, responsive CSS, user experience design.

Automation Flows with n8n

Tech Stack: n8n, REST APIs, webhooks, third-party integrations

- Designed automation workflows connecting multiple services (APIs, databases, notification systems).
- Implemented API-triggered workflows for data processing and notifications.
- Created reusable templates for common integration patterns.
- **Key Learning:** Systems thinking, API integration, workflow design, automation best practices.

CERTIFICATIONS & ACHIEVEMENTS

- **Coding Ninjas – Full Stack Web Development** (Frontend & Backend certificates)
Comprehensive course covering Java, Spring Boot, React, REST APIs, database design and deployment.

- **Coding Ninjas – Java & Data Structures**
Strong foundation in Java fundamentals, OOP, and competitive programming data structures and algorithms.
 - **HighRadius Internship Completion Certificate**
Successfully completed full-stack development internship with hands-on B2B fintech application experience.
-

EDUCATION

B.Tech in Computer Science & Engineering
Chandigarh University, Mohali | Graduated: 2023

ADDITIONAL INFORMATION

- **Open to:** Java Backend, Full-Stack (Java + React/Next.js), and junior software engineer roles.
 - **Learning Focus:** Docker/Kubernetes, cloud deployment (AWS/GCP), DevOps practices, system design basics.
 - **Code Quality:** Regular contributions to GitHub; focus on clean code, proper Git workflows and version control.
 - **Soft Skills:** Quick learner, problem solver, effective communicator, comfortable collaborating with teams.
-
